Energy and Sustainable Economic Development

Policy for energy efficiency behind the implementation of the Directive 2012/27/EU: best practices and outlook to 2030

24th September 2014
European Parliament (ASP1-G2)

In 2012 the European Commission launched the EU Directive 2012/27/EU on Energy Efficiency. Two years later, it is time for a state of the art of its implementation, also in view of the - recently revised - 2030 targets. The event represents the occasion for an open discussion with the EC Representatives, for hearing the political views from EP Members as well as for presenting an Italian "best practice" case in the frame of the directive implementation process.

Programme

13:30 – 13:35 Welcome address

Ms. Simona Bonafè - MEP

13:35 - 13:50 The Energy Efficiency Directive: implementation status at EU level
